
PROFESSIONAL SUMMARY

Software developer with experience in financial services, building NestJS and TypeScript services, Flutter applications, and internal web platforms. Combines API design, relational data, and product-focused interfaces to deliver maintainable software.

EXPERIENCE

Software Development Intern · Quero-Quero (QQTech)

February 2025 – Present

Build BFFs with NestJS and TypeScript, integrated with Oracle databases.

Develop mobile features with Flutter for Android and iOS.

Build an internal admin dashboard with Next.js, React, and MUI, consuming Oracle data.

Maintain CI/CD pipelines in Azure DevOps.

Work with RAG chatbot technology across HTML, TailwindCSS, JavaScript, Node.js, Express, PostgreSQL, and Redis.

PROJECTS

Freebay

Technologies: Flutter (Riverpod), NestJS, Prisma, PostgreSQL, Redis, and Socket.IO.

C2C marketplace with a social feed, profiles, real-time chat, and dispute resolution.

Escrow holds payments until delivery is confirmed, with automatic release or refund.

Payments via PIX (AbacatePay), payouts through PagBank, and push notifications via FCM.
